Subject Index

Alloys *("Various", i.e. not listed elsewhere by name)*
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229
The structural materials for the first wall and plasma facing components of NET, J.L. Boutard 174 (1990) 240
An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264
Correlation of fast neutron, fusion neutron and electron irradiations based on the dislocation loop density, T. Muroga, H. Watanabe and N. Yoshida 174 (1990) 282
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289

Blanket Materials
Doped lithium orthosilicate: Preparation and properties, D. Vollath, H. Wedemeyer, H. Zimmermann and H. Werle 174 (1990) 86
Formation of water in a Li_2O bed at hydrogen addition to purge gas (Letter to the Editors), M. Nishikawa, Y. Kawamura, K. Munakata and H. Matsumoto 174 (1990) 121
The structural materials for the first wall and plasma facing components of NET, J.L. Boutard 174 (1990) 240

Ceramics *("Various", i.e. not listed elsewhere by name)*
Investigations on ceramic materials for fusion technology, W. Dienst, T. Fett, R. Heidinger, H.D. Röhrig and B. Schulz 174 (1990) 102
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196

Cladding Materials
Distributions of radionuclides on and in spent nuclear fuel claddings of pressurized water reactors, T. Hirabayashi, T. Sato, C. Sagawa, N.M. Masaki, M. Saeki and T. Adachi 174 (1990) 45
Damage parameters for candidate fusion materials irradiation test facilities, D.G. Doran, F.M. Mann and L.R. Greenwood 174 (1990) 125
The structural materials for the first wall and plasma facing components of NET, J.L. Boutard 174 (1990) 240
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289

Coatings *(and Coated Particles)*
Diffusion Coefficients of Fission Products in the UO_2 kernel and pyrocarbon layer of BISO-coated fuel particles at extremely high temperatures, K. Hayashi and K. Fukuda 174 (1990) 35

Compatibility and Corrosion
On the kinetics of UO_2 interaction with Zircaloy at high temperatures, M.S. Veshchunov 174 (1990) 72

Computer Calculations, including Modelling
On the kinetics of UO_2 interaction with Zircaloy at high temperatures, M.S. Veshchunov 174 (1990) 72
Influence of cascade damage on helium diffusion and bubble nucleation, H. Trinkaus, B.N. Singh and A.J.E. Foreman 174 (1990) 80
Damage parameters for candidate fusion materials irradiation test facilities, D.G. Doran, F.M. Mann and L.R. Greenwood 174 (1990) 125
Considerations of recoil effects in microstructural evolution, C.A. English, W.J. Phythian and A.J.E. Foreman 174 (1990) 135
Progress in the development of a molecular dynamics code for high-energy cascade studies, T. Diaz de la Rubia and M.W. Guinan 174 (1990) 151
Nucleation and growth theory of cavity evolution under conditions of cascade damage and high helium generation, N.M. Ghoniem 174 (1990) 168
Cascade structure in low temperature fission and fusion neutron-irradiated metals, Y. Shimomura, H. Fukushima and M.W. Guinan 174 (1990) 210
On irradiation experiments in view of fusion condition simulation, E.A. Koptelov, V.V. Korolev and A.A. Semenov 174 (1990) 311
Concept and neutron-field characteristics of ESNIT, K. Noda, Y. Oyama, S. Yamaguchi, H. Maekawa and A. Hishinuma 174 (1990) 319

Constitution

Experimental determination of the phase relationships in Zr/2.5–8.0 at% Nb/0–6.7 at% Al alloys with 750 at ppm O and 250 at ppm N between 730–900 °C, A. Peruzzi and J. Bolcich 174 (1990) 1

Copper and Copper Alloys

Thermal release behavior of helium implanted into copper at high fluences, T. Yamauchi, S. Yamanaka and M. Miyake 174 (1990) 53

Considerations of recoil effects in microstructural evolution, C.A. English, W.J. Phythian and A.J.E. Foreman 174 (1990) 135

Progress in the development of a molecular dynamics code for high-energy cascade studies, T. Diaz de la Rubia and M.W. Guinan 174 (1990) 151

The structural materials for the first wall and plasma facing components of NET, J.L. Boutard 174 (1990) 240

Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327

Creep and Relaxation

Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229

Effects of light-ion irradiation on mechanical properties of metals and alloys, P. Jung and H. Ullmaier 174 (1990) 253

An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264

Defects and Defect Structures

Electron-irradiation induced defects in an $Fe_9Cr_{16}Ni_{75}$ austenitic alloy, C. Dimitrov, D. Huguenin, P. Moser and O. Dimitrov 174 (1990) 22

Influence of cascade damage on helium diffusion and bubble nucleation, H. Trinkaus, B.N. Singh and A.J.E. Foreman 174 (1990) 80

Considerations of recoil effects in microstructural evolution, C.A. English, W.J. Phythian and A.J.E. Foreman 174 (1990) 135

Damage correlation for cascade properties, V. Naundorf and H. Wollenberger 174 (1990) 141

Production of freely-migrating defects, L.E. Rehn 174 (1990) 144

Progress in the development of a molecular dynamics code for high-energy cascade studies, T. Diaz de la Rubia and M.W. Guinan 174 (1990) 151

Role of charged particle irradiations in the study of radiation damage correlation, S. Ishino and N. Sekimura 174 (1990) 158

Nucleation and growth theory of cavity evolution under conditions of cascade damage and high helium generation, N.M. Ghoniem 174 (1990) 168

Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178

A diffusion approach to modelling of irradiation-induced cascades, C.H. Woo, B.N. Singh and H. Heinisch 174 (1990) 190

Cascade structure in low temperature fission and fusion neutron-irradiated metals, Y. Shimomura, H. Fukushima and M.W. Guinan 174 (1990) 210

Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220

Correlation of fast neutron, fusion neutron and electron irradiations based on the dislocation loop density, T. Muroga, H. Watanabe and N. Yoshida 174 (1990) 282

The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289

On irradiation experiments in view of fusion condition simulation, E.A. Koptelov, V.V. Korolev and A.A. Semenov 174 (1990) 311

Diffusion *(incl. Thermodiffusion)*

Diffusion Coefficients of Fission Products in the UO_2 kernel and pyrocarbon layer of BISO-coated fuel particles at extremely high temperatures, K. Hayashi and K. Fukuda 174 (1990) 35

Influence of cascade damage on helium diffusion and bubble nucleation, H. Trinkaus, B.N. Singh and A.J.E. Foreman 174 (1990) 80

Damage correlation for cascade properties, V. Naundorf and H. Wollenberger 174 (1990) 141

Production of freely-migrating defects, L.E. Rehn 174 (1990) 144

Nucleation and growth theory of cavity evolution under conditions of cascade damage and high helium generation, N.M. Ghoniem 174 (1990) 168

Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178

A diffusion approach to modelling of irradiation-induced cascades, C.H. Woo, B.N. Singh and H. Heinisch 174 (1990) 190

Divertor
The structural materials for the first wall and plasma facing components of NET, J.L. Boutard 174 (1990) 240

Electrical Properties
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229

Electron Microscopy and Electron Probe Microanalysis
Role of charged particle irradiations in the study of radiation damage correlation, S. Ishino and N. Sekimura 174 (1990) 158
Cascade structure in low temperature fission and fusion neutron-irradiated metals, Y. Shimomura, H. Fukushima and M.W. Guinan 174 (1990) 210
Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220
Correlation of fast neutron, fusion neutron and electron irradiations based on the dislocation loop density, T. Muroga, H. Watanabe and N. Yoshida 174 (1990) 282
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289
Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327

Experimental Techniques
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196

Fast Reactors
Electron-irradiation induced defects in an $Fe_9Cr_{16}Ni_{75}$ austenitic alloy, C. Dimitrov, D. Huguenin, P. Moser and O. Dimitrov 174 (1990) 22

Fatigue
Effects of light-ion irradiation on mechanical properties of metals and alloys, P. Jung and H. Ullmaier 174 (1990) 253
An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264

Fission Products
Dissolution of a simulated fission-produced noble metal alloy in nitric acid solution at 383 K, T. Matsui, T. Yamamoto and K. Naito 174 (1990) 16
Diffusion Coefficients of Fission Products in the UO_2 kernel and pyrocarbon layer of BISO-coated fuel particles at extremely high temperatures, K. Hayashi and K. Fukuda 174 (1990) 35
Distributions of radionuclides on and in spent nuclear fuel claddings of pressurized water reactors, T. Hirabayashi, T. Sato, C. Sagawa, N.M. Masaki, M. Saeki and T. Adachi 174 (1990) 45
Dissolution study of spent PWR fuel: Dissolution behavior and chemical properties of insoluble residues, T. Adachi, M. Ohnuki, N. Yoshida, T. Sonobe, W. Kawamura, H. Takeishi, K. Gunji, T. Kimura, T. Suzuki, Y. Nakahara, T. Muromura, Y. Kobayashi, H. Okashita and T. Yamamoto 174 (1990) 60

Fracture and Fracture Toughness
Gamma-ray irradiation effects on interlaminar tearing strength of epoxy-based FRP, T. Nishiura, K. Katagiri, S. Nishijima, T. Okada and S. Nakahara 174 (1990) 110

Fuels and Fuel Elements
Experimental determination of the phase relationships in Zr/2.5–8.0 at% Nb/0–6.7 at% Al alloys with 750 at ppm O and 250 at ppm N between 730–900 °C, A. Peruzzi and J. Bolcich 174 (1990) 1
Diffusion Coefficients of Fission Products in the UO_2 kernel and pyrocarbon layer of BISO-coated fuel particles at extremely high temperatures, K. Hayashi and K. Fukuda 174 (1990) 35
Distributions of radionuclides on and in spent nuclear fuel claddings of pressurized water reactors, T. Hirabayashi, T. Sato, C. Sagawa, N.M. Masaki, M. Saeki and T. Adachi 174 (1990) 45
Dissolution study of spent PWR fuel: Dissolution behavior and chemical properties of insoluble residues, T. Adachi, M. Ohnuki, N. Yoshida, T. Sonobe, W. Kawamura, H. Takeishi, K. Gunji, T. Kimura, T. Suzuki, Y. Nakahara, T. Muromura, Y. Kobayashi, H. Okashita and T. Yamamoto 174 (1990) 60
On the kinetics of UO_2 interaction with Zircaloy at high temperatures, M.S. Veshchunov 174 (1990) 72

Fusion Reactors
Influence of cascade damage on helium diffusion and bubble nucleation, H. Trinkaus, B.N. Singh and A.J.E. Foreman 174 (1990) 80

Doped lithium orthosilicate: Preparation and properties, D. Vollath, H. Wedemeyer, H. Zimmermann and H. Werle 174 (1990) 86
Investigations on ceramic materials for fusion technology, W. Dienst, T. Fett, R. Heidinger, H.D. Röhrig and B. Schulz 174 (1990) 102
Damage parameters for candidate fusion materials irradiation test facilities, D.G. Doran, F.M. Mann and L.R. Greenwood 174 (1990) 125
Production of freely-migrating defects, L.E. Rehn 174 (1990) 144
Progress in the development of a molecular dynamics code for high-energy cascade studies, T. Diaz de la Rubia and M.W. Guinan 174 (1990) 151
Role of charged particle irradiations in the study of radiation damage correlation, S. Ishino and N. Sekimura 174 (1990) 158
Nucleation and growth theory of cavity evolution under conditions of cascade damage and high helium generation, N.M. Ghoniem 174 (1990) 168
Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178
Cascade structure in low temperature fission and fusion neutron-irradiated metals, Y. Shimomura, H. Fukushima and M.W. Guinan 174 (1990) 210
Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229
The structural materials for the first wall and plasma facing components of NET, J.L. Boutard 174 (1990) 240
Effects of light-ion irradiation on mechanical properties of metals and alloys, P. Jung and H. Ullmaier 174 (1990) 253
An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264
Correlation of fast neutron, fusion neutron and electron irradiations based on the dislocation loop density, T. Muroga, H. Watanabe and N. Yoshida 174 (1990) 282
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289
On irradiation experiments in view of fusion condition simulation, E.A. Koptelov, V.V. Korolev and A.A. Semenov 174 (1990) 311
Concept and neutron-field characteristics of ESNIT, K. Noda, Y. Oyama, S. Yamaguchi, H. Maekawa and A. Hishinuma 174 (1990) 319
Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327
Summary of Silkeborg Workshop on "Radiation Damage Correlation for Fusion Conditions", C.A. English, W.V. Green, M. Guinan, A. Horsewell, S. Ishino, B.N. Singh and M. Victoria 174 (1990) 352

Gases *(excl. Tritium)* **in Metals, Alloys and Ceramics**

Nucleation and growth theory of cavity evolution under conditions of cascade damage and high helium generation, N.M. Ghoniem 174 (1990) 168

Graphite and Carbon

Diffusion Coefficients of Fission Products in the UO_2 kernel and pyrocarbon layer of BISO-coated fuel particles at extremely high temperatures, K. Hayashi and K. Fukuda 174 (1990) 35
Enhancement of C_2H_2 formation due to interaction of graphite with energetic protons (Letter to the Editors), R. Yamada 174 (1990) 118

Heat Shock Resistance

Investigations on ceramic materials for fusion technology, W. Dienst, T. Fett, R. Heidinger, H.D. Röhrig and B. Schulz 174 (1990) 102

Helium

Thermal release behavior of helium implanted into copper at high fluences, T. Yamauchi, S. Yamanaka and M. Miyake 174 (1990) 53
Influence of cascade damage on helium diffusion and bubble nucleation, H. Trinkaus, B.N. Singh and A.J.E. Foreman 174 (1990) 80
Damage parameters for candidate fusion materials irradiation test facilities, D.G. Doran, F.M. Mann and L.R. Greenwood 174 (1990) 125
Role of charged particle irradiations in the study of radiation damage correlation, S. Ishino and N. Sekimura 174 (1990) 158
Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229
Effects of light-ion irradiation on mechanical properties of metals and alloys, P. Jung and H. Ullmaier 174 (1990) 253
An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in

austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289

Hydrogen and Hydrides *(incl. Deuterium and Deuterides)*
Formation of water in a Li_2O bed at hydrogen addition to purge gas (Letter to the Editors), M. Nishikawa, Y. Kawamura, K. Munakata and H. Matsumoto 174 (1990) 121

Irradiation Effects *(excl. Swelling and Voids)*
Thermal release behavior of helium implanted into copper at high fluences, T. Yamauchi, S. Yamanaka and M. Miyake 174 (1990) 53
Gamma-ray irradiation effects on interlaminar tearing strength of epoxy-based FRP, T. Nishiura, K. Katagiri, S. Nishijima, T. Okada and S. Nakahara 174 (1990) 110
Enhancement of C_2H_2 formation due to interaction of graphite with energetic protons (Letter to the Editors), R. Yamada 174 (1990) 118
Considerations of recoil effects in microstructural evolution, C.A. English, W.J. Phythian and A.J.E. Foreman 174 (1990) 135
Damage correlation for cascade properties, V. Naundorf and H. Wollenberger 174 (1990) 141
Production of freely-migrating defects, L.E. Rehn 174 (1990) 144
Role of charged particle irradiations in the study of radiation damage correlation, S. Ishino and N. Sekimura 174 (1990) 158
Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178
A diffusion approach to modelling of irradiation-induced cascades, C.H. Woo, B.N. Singh and H. Heinisch 174 (1990) 190
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196
Cascade structure in low temperature fission and fusion neutron-irradiated metals, Y. Shimomura, H. Fukushima and M.W. Guinan 174 (1990) 210
Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229
The structural materials for the first wall and plasma facing components of NET, J.L. Boutard 174 (1990) 240
Effects of light-ion irradiation on mechanical properties of metals and alloys, P. Jung and H. Ullmaier 174 (1990) 253
An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264
Correlation of fast neutron, fusion neutron and electron irradiations based on the dislocation loop density, T. Muroga, H. Watanabe and N. Yoshida 174 (1990) 282
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289
On irradiation experiments in view of fusion condition simulation, E.A. Koptelov, V.V. Korolev and A.A. Semenov 174 (1990) 311
Concept and neutron-field characteristics of ESNIT, K. Noda, Y. Oyama, S. Yamaguchi, H. Maekawa and A. Hishinuma 174 (1990) 319
Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327
Summary of Silkeborg Workshop on "Radiation Damage Correlation for Fusion Conditions", C.A. English, W.V. Green, M. Guinan, A. Horsewell, S. Ishino, B.N. Singh and M. Victoria 174 (1990) 352

Kinetics
On the kinetics of UO_2 interaction with Zircaloy at high temperatures, M.S. Veshchunov 174 (1990) 72
Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178

Mechanical Properties *("Various", i.e. not listed elsewhere by name)*
Investigations on ceramic materials for fusion technology, W. Dienst, T. Fett, R. Heidinger, H.D. Röhrig and B. Schulz 174 (1990) 102
Gamma-ray irradiation effects on interlaminar tearing strength of epoxy-based FRP, T. Nishiura, K. Katagiri, S. Nishijima, T. Okada and S. Nakahara 174 (1990) 110
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196
Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229

The structural materials for the first wall and plasma facing components of net, J.L. Boutard 174 (1990) 240
An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264
Summary of Silkeborg Workshop on "Radiation Damage Correlation for Fusion Conditions", C.A. English, W.V. Green, M. Guinan, A. Horsewell, S. Ishino, B.N. Singh and M. Victoria 174 (1990) 352

Microstructure *(incl. Textures)*
A diffusion approach to modelling of irradiation-induced cascades, C.H. Woo, B.N. Singh and H. Heinisch 174 (1990) 190
Cascade structure in low temperature fission and fusion neutron-irradiated metals, Y. Shimomura, H. Fukushima and M.W. Guinan 174 (1990) 210
Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220
Correlation of fast neutron, fusion neutron and electron irradiations based on the dislocation loop density, T. Muroga, H. Watanabe and N. Yoshida 174 (1990) 282
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289
Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327

Nickel and Nickel Alloys
Electron-irradiation induced defects in an $Fe_9Cr_{16}Ni_{75}$ austenitic alloy, C. Dimitrov, D. Huguenin, P. Moser and O. Dimitrov 174 (1990) 22
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229
Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327

Phase Transformation
Doped lithium orthosilicate: Preparation and properties, D. Vollath, H. Wedemeyer, H. Zimmermann and H. Werle 174 (1990) 86
Composition and oxygen potential of cubic fluorite-type solid solution $Eu_yU_{1-y}O_{2+x}$ ($x \gtrless 0$) and rhombohedral $Eu_6UO_{12+x'}$ ($x' < 0$), T. Fujino, K. Ouchi, Y. Mozumi, R. Ueda and H. Tagawa 174 (1990) 92

Physical Properties *("Various", i.e. not listed elsewhere by name)*
Investigations on ceramic materials for fusion technology, W. Dienst, T. Fett, R. Heidinger, H.D. Röhrig and B. Schulz 174 (1990) 102

Powder Processes and Products
Further interpretation of sintering data in zirconia–urania mixed oxide powder compacts, P. Das and R. Choudhury 174 (1990) 76

Reprocessing
Dissolution of a simulated fission-produced noble metal alloy in nitric acid solution at 383 K, T. Matsui, T. Yamamoto and K. Naito 174 (1990) 16
Distributions of radionuclides on and in spent nuclear fuel claddings of pressurized water reactors, T. Hirabayashi, T. Sato, C. Sagawa, N.M. Masaki, M. Saeki and T. Adachi 174 (1990) 45
Dissolution study of spent PWR fuel: Dissolution behavior and chemical properties of insoluble residues, T. Adachi, M. Ohnuki, N. Yoshida, T. Sonobe, W. Kawamura, H. Takeishi, K. Gunji, T. Kimura, T. Suzuki, Y. Nakahara, T. Muromura, Y. Kobayashi, H. Okashita and T. Yamamoto 174 (1990) 60

Segregation
Damage correlation for cascade properties, V. Naundorf and H. Wollenberger 174 (1990) 141

Steels
Electron-irradiation induced defects in an $Fe_9Cr_{16}Ni_{75}$ austenitic alloy, C. Dimitrov, D. Huguenin, P. Moser and O. Dimitrov 174 (1990) 22
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196
Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220
Effects of light-ion irradiation on mechanical properties of metals and alloys, P. Jung and H. Ullmaier 174 (1990) 253

Structural Materials
Influence of cascade damage on helium diffusion and bubble nucleation, H. Trinkaus, B.N. Singh and A.J.E. Foreman 174 (1990) 80
Microstructure formation and its role on yield strength in AISI 316 SS irradiated by fission and fusion neutrons, N. Yoshida 174 (1990) 220
The structural materials for the first wall and plasma facing components of net, J.L. Boutard 174 (1990) 240

An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289

Surface Effects and Characterization Techniques
Thermal release behavior of helium implanted into copper at high fluences, T. Yamauchi, S. Yamanaka and M. Miyake 174 (1990) 53
Enhancement of C_2H_2 formation due to interaction of graphite with energetic protons (Letter to the Editors), R. Yamada 174 (1990) 118
Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327

Swelling
Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229
On irradiation experiments in view of fusion condition simulation, E.A. Koptelov, V.V. Korolev and A.A. Semenov 174 (1990) 311

Thermal Reactors
Experimental determination of the phase relationships in Zr/2.5–8.0 at% Nb/0–6.7 at% Al alloys with 750 at ppm O and 250 at ppm N between 730–900 °C, A. Peruzzi and J. Bolcich 174 (1990) 1
On the kinetics of UO_2 interaction with Zircaloy at high temperatures, M.S. Veshchunov 174 (1990) 72

Thermodynamic Properties
Composition and oxygen potential of cubic fluorite-type solid solution $Eu_yU_{1-y}O_{2+x}$ ($x \gtrless 0$) and rhombohedral $Eu_6UO_{12+x'}$ ($x' < 0$), T. Fujino, K. Ouchi, Y. Mozumi, R. Ueda and H. Tagawa 174 (1990) 92

Thermophysical Properties
Investigations on ceramic materials for fusion technology, W. Dienst, T. Fett, R. Heidinger, H.D. Röhrig and B. Schulz 174 (1990) 102

Tritium
Doped lithium orthosilicate: Preparation and properties, D. Vollath, H. Wedemeyer, H. Zimmermann and H. Werle 174 (1990) 86

Uranium Ceramics
Dissolution study of spent PWR fuel: Dissolution behavior and chemical properties of insoluble residues, T. Adachi, M. Ohnuki, N. Yoshida, T. Sonobe, W. Kawamura, H. Takeishi, K. Gunji, T. Kimura, T. Suzuki, Y. Nakahara, T. Muromura, Y. Kobayashi, H. Okashita and T. Yamamoto 174 (1990) 60
On the kinetics of UO_2 interaction with Zircaloy at high temperatures, M.S. Veshchunov 174 (1990) 72
Further interpretation of sintering data in zirconia–urania mixed oxide powder compacts, P. Das and R. Choudhury 174 (1990) 76
Composition and oxygen potential of cubic fluorite-type solid solution $Eu_yU_{1-y}O_{2+x}$ ($x \gtrless 0$) and rhombohedral $Eu_6UO_{12+x'}$ ($x' < 0$), T. Fujino, K. Ouchi, Y. Mozumi, R. Ueda and H. Tagawa 174 (1990) 92

Vanadium and Vanadium Alloys
Fundamental aspects of high-energy ion-beam simulation techniques and their relevance to fusion materials studies, D.J. Mazey 174 (1990) 196

Vitrification
Role of charged particle irradiations in the study of radiation damage correlation, S. Ishino and N. Sekimura 174 (1990) 158
Nucleation and growth theory of cavity evolution under conditions of cascade damage and high helium generation, N.M. Ghoniem 174 (1990) 168
Possible effects of collision cascades on bubble and void nucleation in metals, H. Trinkaus 174 (1990) 178
Influence of transmutation and high neutron fluence on materials used in fission–fusion correlation experiments, F.A. Garner 174 (1990) 229
An assessment of tensile, irradiation creep, creep rupture, and fatigue behavior in austenitic stainless steels with emphasis on spectral effects, M.L. Grossbeck, K. Ehrlich and C. Wassilew 174 (1990) 264
The influence of helium on microstructural evolution: Implications for DT fusion reactors, R.E. Stoller 174 (1990) 289
Fission–fusion correlation by fission reactor irradiation with improved control, M. Kiritani, T. Yoshiie, S. Kojima, Y. Satoh and K. Hamada 174 (1990) 327

Summary of Silkeborg Workshop on "Radiation Damage Correlation for Fusion Conditions", C.A. English, W.V. Green, M. Guinan, A. Horsewell, S. Ishino, B.N. Singh and M. Victoria 174 (1990) 352

Zirconium, Zirconium Alloys and Compounds

Experimental determination of the phase relationships in Zr/2.5–8.0 at% Nb/0–6.7 at% Al alloys with 750 at ppm O and 250 at ppm N between 730–900 °C, A. Peruzzi and J. Bolcich 174 (1990) 1

Distributions of radionuclides on and in spent nuclear fuel claddings of pressurized water reactors, T. Hirabayashi, T. Sato, C. Sagawa, N.M. Masaki, M. Saeki and T. Adachi 174 (1990) 45

On the kinetics of UO_2 interaction with Zircaloy at high temperatures, M.S. Veshchunov 174 (1990) 72

Further interpretation of sintering data in zirconia–urania mixed oxide powder compacts, P. Das and R. Choudhury 174 (1990) 76
